

U.S. House of Representatives
Committee on Agriculture
Washington, DC 20515

May 15, 2023

Our nation's 1890 Land-Grant Institutions play an important role in providing the critical teaching, research, and extension necessary to ensure American agriculture produces the safest, most abundant and affordable supply of food and fiber in the world. These institutions, originally established to support the education of Black students, continue to help bridge the gap in underserved communities, diversifying American agriculture and developing the pipeline of talented minds joining our agricultural workforce. As the industry takes on the major challenges that lie ahead, investing in our 1890 Land-Grant Institutions will be important to advance the leadership and competitiveness of the American food and agriculture industries.

Research and extension activities at Land-Grant Institutions are carried out through a combination of Federal, State, and local funds. Specifically, Federal capacity funds to support these activities are allocated to institutions based on statutory formulas. However, States support these investments through matching funds, as required by Section 1449(c) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.

To better understand which States were meeting this matching fund requirement, Congress included a provision in the Agriculture Improvement Act of 2018 requiring the United States Department of Agriculture (USDA) to publish an annual report on the allocations to and matching funds received by 1862 and 1890 Land-Grant Institutions. According to the FY2022 Allocation and Matching Report, six 1890 Land-Grant Institutions did not receive full matching funds for research and extension activities from their State.¹ In comparison, the 1862 Land-Grant Institution in each of the 50 States have consistently received full matching funds, perpetuating the disparity between 1862 and 1890 Land-Grant Institutions.

While USDA has the authority to waive a portion of the matching requirements, the 1890 Land-Grant Institutions not receiving full matching funds are left to carry out the Land-Grant mission with fewer funds than intended. For example, these six institutions did not receive a total of \$9 million for research activities and \$7.3 million for extension activities in state matching funds in FY2022.

Valuable research provided by 1890 Land-Grant Institutions helps to innovate new technologies and methods addressing various issues in agriculture, the benefits of which extend to communities well beyond the farm. For American agriculture to remain resilient, secure, and globally competitive, we must ensure equitable investment in all our Land-Grant Institutions, who have been drivers of innovation. Your

State's commitment to matching funding for 1890 Land-Grant Institutions will maximize agriculture's talent pipeline and positively impact the next generation of agricultural leaders.

We hope by bringing this disparity to your attention, we highlight an opportunity for future investment in teaching, research, and extension. As you develop your State budget priorities, we encourage you to work with the USDA National Institute of Food and Agriculture to fully understand the impact additional investments will have on your State's agriculture industry.

Sincerely,

Glenn "GT" Thompson
